SKILLS

JavaScript, React, Redux, HTML5, CSS3, Ruby, Ruby on Rails, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Webpack, jQuery, D3.js, Git, Heroku

PROJECTS

CINEFLIX (Ruby on Rails, React/Redux, PostgreSQL, AWS S3)

[live](#) | [github](#)

A Netflix clone, allowing users to browse and watch from a collection of movies, and add and remove titles to/from a personal list.

- Applied custom user authentication framework for both the backend and frontend, allowing users to securely create an account and login or logout of their account.
- Utilized Amazon Web Services (AWS) as a media server to host all movie media and render it for logged-in users.
- Built functionality allowing users to save a personalized library of movies, as well as dynamically search for movies within the database by title.

PANDAMONIUM (MongoDB, Mongoose, React/Redux, Express.js, Node.js)

[live](#) | [github](#)

A MERN stack team project focused on a location-based social media app for the LGBTQ community and friends.

- Spearheaded production of the application's backend framework, including implementation of user authentication, CRUD functionality for user posts/comments, and creation of unique location-based forums.
- Devised the frontend mechanic that directs and assigns users to their respective geographic forums, to foster smaller, intimate communities and encourage physical 'meet-ups'.
- Partnered with frontend lead on visual aspects of forum pages and coordinated meetings to discuss code assimilation.

BOXSTATS (JavaScript, D3.js, HTML5, CSS3)

[live](#) | [github](#)

A data visualization tool detailing the current stats of the top active boxers in the world today.

- Designed intuitive app layout, employing a scrollable fighter index module -- each of which acts as a link to display specific data points for a boxer.
- Implemented the D3.js library to visualize core data points for each boxer, including a 'fighter snapshot' which includes basic fighter information (name, age, height, etc.) and a mini-chart for recent-fight stats.
- Arranged a main 'career chart', comparing a fighter's career stats (career win%, career K.O.%) to other ranked fighters.

EXPERIENCE

Corporate Transactional Attorney

Richards, Layton & Finger, P.A.

Aug 2018 - Dec 2020

- Oversaw a complex refinancing transaction for a major international Investment firm across multiple loan pools and hundreds of limited liability companies (LLCs) and limited partnerships (LPs).
- Rendered advice for LLCs and LPs related to formation, corporate governance, dissolution and conversion.
- Drafted legal opinions asserting bankruptcy-remote status for hundreds of LLCs and other special purpose entities.
- Drafted corporate resolutions for LLCs and private equity funds, related to financings and corporate restructuring deals.
- Reviewed and provided comments on organizational and transactional documents (e.g., LLC agreements, fund agreements, corporate resolutions, side letters) in structured finance transactions, fund formation and fund financings.

EDUCATION

Web Development - App Academy

Dec 2020

Intensive software development course with a focus on full-stack web development, which entailed 1000+ hours of coding.

Juris Doctor - Cornell Law School

May 2018

B.A. - Binghamton University

May 2014
